Cost Estimates Explained

SimonMed Imaging provides an estimated cost that will be due when you receive your physician ordered exam. Like most medical providers, we gain information from your insurance company regarding your plan. Based on the exam and the amount your insurance covers, an estimated cost is provided.

- **SimonMed checks your insurance benefits, prior to services being rendered, to provide an estimated cost at time of service.**

Based on the exam(s) ordered by your physician, your insurance company reports to SimonMed the estimated amount the patient may be responsible for based on the current status of their policy. This does not include any pending claims that have not been processed. Please note it takes 6-8 weeks for most claims to be processed by your insurance and to update deductible, coinsurance, and Out-of-pocket maximum balances.

If you have additional questions about your estimated amount due at time of service, you can email us at EstimatedCost@simonmed.com.
